

## Progress Report DMBR/ MEM; Wednesdays, 12.30h, Room MEM/ H810

Date	Speaker	Research Group	Title
March 07, 2018	<b>Jonas Koch</b>	Radiation-Oncology	DNA-PK regulates the radio-sensitivity and oncogenicity of MET addicted cancer cell lines via a novel MET phosphosite
March 21, 2018	<b>Astrid A. Glück</b>	Radiation-Oncology	Characterizing the function of a novel ubiquitination site on histone variant H2AX identified via shotgun proteomics
April 04, 2018	<b>Olivier Pascal</b>	IFIK (Prof. S. Hapfelmeier)	Immune adaptation biases intestinal bacteria-bacteria competition
April 18, 2018	<b>Anna Wenning</b>	Gastroenterology/ Mucosal Immunology	Influence of microbiota on development of skin barrier
May 02, 2018	<b>Marcel Sorribas</b>	Gastroenterology/ Mucosal Immunology	Gut-vascular barrier in liver cirrhosis: entry site for bacterial translocation from the gut to the liver independent from portal hypertension and lymphatic route
May 16, 2018	<b>Catherine Mooser</b>	Gastroenterology/ Mucosal Immunology	Gnotobiology and next-generation sequencing techniques as tools to study dietary influences on the microbiota
May 30, 2018	<b>Maria-Nieves Sanz &amp; Maria Arnold</b>	Cardiovascular Surgery	Cardioprotective reperfusion strategies in a rat model of DCD heart transplantation: Underlying mitochondrial and metabolic mechanisms
June 13, 2018	<b>Natalia Mendez Carmona &amp; Rahel Wyss</b>	Cardiovascular Surgery	Characterization and protection of cardiac endothelium and mitochondria to facilitate DCD heart transplantation
