

Progress Report DMBR/ MEM; Wednesdays, 12.30h, Room MEM/ H810

| Date | Speaker | Research Group | Title |
|----------------|--|---|--|
| March 07, 2018 | Jonas Koch | Radiation-Oncology | DNA-PK regulates the radio-sensitivity and oncogenicity of MET addicted cancer cell lines via a novel MET phosphosite |
| March 21, 2018 | Astrid A. Glück | Radiation-Oncology | Characterizing the function of a novel ubiquitination site on histone variant H2AX identified via shotgun proteomics |
| April 04, 2018 | Olivier Schären | IFIK (Prof. S. Hapfelmeier) | Immune adaptation biases intestinal bacteria-bacteria competition |
| April 18, 2018 | Anna Wenning | Gastroenterology/ Mucosal Immunology | Influence of microbiota on development of skin barrier |
| May 02, 2018 | Marcel Sorribas | Gastroenterology/ Mucosal Immunology | Gut-vascular barrier in liver cirrhosis: entry site for bacterial translocation from the gut to the liver independent from portal hypertension and lymphatic route |
| May 16, 2018 | Catherine Mooser | Gastroenterology/ Mucosal Immunology | Gnotobiology and next-generation sequencing techniques as tools to study dietary influences on the microbiota |
| May 30, 2018 | Maria-Nieves Sanz & Maria Arnold | Cardiovascular Surgery | Cardioprotective reperfusion strategies in a rat model of DCD heart transplantation: Underlying mitochondrial and metabolic mechanisms |
| June 13, 2018 | Natalia Mendez Carmona & Rahel Wyss | Cardiovascular Surgery | Characterization and protection of cardiac endothelium and mitochondria to facilitate DCD heart transplantation |
