

## Dr. Panagiotis Chouvardas receives the venia docendi

We are delighted to announce that Dr. Panagiotis Chouvardas, research group leader in the cancer therapy resistance (CTR) program at the DBMR, has been awarded the venia docendi (habilitation) for his research on Computational Biology.

[Panagiotis Chouvardas](#) is an expert in the development of computational methods for the analysis and interpretation of high-dimensional data.

Since 2024 he has been a group leader at the Department for BioMedical Research of the University of Bern and the Department of Urology (Inselspital). Recent achievements from his lab include the acquisition of an Innosuisse Flagship grant as co-PI and the receipt of the Faculty Teaching award (Faculty of Science) for his course in RNA-sequencing.

We warmly congratulate Dr. Chouvardas on the well-deserved habilitation!
