**Department for BioMedical
Research**

Direktion:
Prof. Mark A. Rubin, MD

Bern, November 30, 2017

Dear colleagues,

If you or your co-workers are planning to submit a grant application that will lead to structural changes in your research group (i.e. ERC Grants, Ambizione Grants SNF Förderprofessuren) or that will require significant new resources (lab space, equipment, holding capacity in the animal facilities), please contact me before submission. It is relevant to define with the Department the future needs of your group and the resources the DBMR can offer. It will be our goal to support your applications with all our means, but the requirements need to be specified and the possibilities need to be discussed, otherwise, the support from the DBMR may not be adequate.

Please contact Ms Claudia Requeta, claudia.requeta@dbmr.unibe.ch to organise a meeting!

Prof. Mark A. Rubin, Director DBMR
